

# What is the NDIS?

The National Disability Insurance Scheme (NDIS) scheme supports eligible people with a permanent and significant disability to take part in everyday activities. This includes people whose disability is a cognitive, intellectual, neurological sensory or physical impairment, or a psychiatric condition. Eligible participants will have choice and control over their disability supports, including being able to choose who provides supports and how they are delivered and managed.

The NDIS can provide all people with disability with information and connections to services in their communities such as doctors, sporting clubs, support groups, libraries and schools, as well as information about what support is provided by each state and territory government.

## Service List
